Academic year: 2018-19

Date: 10th March 2019

**A Report on "Parents' Awareness Program" at Ghodasgon
(Tal. Muktainagar) Held on 6th March 2019**

As per the instructions of the principal and demands from the parents and students a "Parents' Awareness Program" was held at Ghodasgaon on 6th March 2019.

Aim: To orient parents in the rural area towards new pedagogical tools so that they understand the need of using smart phones as an ICT learning tool.

Objectives:

1. To get access to smart phone as a learning tool for girl students.
2. To make awareness among the parents about the good and bad aspects of using mobiles.
3. To create awareness among the students and parents about effects of excess use of smart phones.
4. To bridge the understanding gap between students and parents.
5. To create harmonious relation among teacher, parents and students.

The Report of the Meet:

1. The reason for holding the meet at the village: The parents of the students were mostly farmers and laborers. So they could not afford a lot of time to interact with the teachers. Hence the teachers decided to visit the parents at their own villages.
2. Values and ethics of area: the college is situated at the rural area. The parents believe in education institutions as 100% stakeholders for the development of the students. There was a need to make awareness among parents to be responsible for the development of the students as a stakeholder.
3. Interaction with parents: Through the interaction the parents presented their views regarding the development of the students. Some parents were

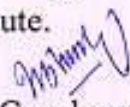

satisfied by the leaning culture of the college. Some complained that mobiles should be completely banned from the college. Parents were unaware of the use of mobile as a learning tool. Prof. L. B. Gayakwad and Dr. P. A. Waghmare made awareness among them that smart phones are important learning tools. It is reservoir of knowledge. They had to allow the students to use it. Specially the parents of girl students did not allow them. It was suggested that under the supervision of the parents the technology should be made available for learning. From the interaction with the parents it became evident that the excess use of mobile was spoiling the mental as well physical health of the students. The parents demanded that an awareness program on the appropriate use of smart phones should be organized for the students into the college. The teachers consented to the proposal. The teachers informed about the development of the college and requested to visit it. The parents understood their importance as a stakeholder of the college and consented to visit the college now and then.

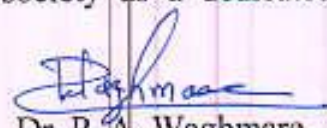

49 parents attended the program while 75 students were present the program. Eknath Nhavkar, Aksh Ingale, Kajal kapale, Dipali Dutte worked hard to make the program successful. Prof. Praful Jaware contributed a lot to make the program successful.

Impact of the program:

1. The parents got impressed by the initiative by the college.
2. They understood their responsibility as a stakeholder.
3. The understanding gap among the parents, students and teachers was bridged.
4. The parents were satisfied with the college faculty for orienting education towards student centric.
5. The students got benefitted as parents believed in the teachers more than their wards.
6. The girl students got more access to the smart phones as a learning tool.
7. The image of the college strengthened in the society as a dedicated institute.
